Aftercare Advice

If an allergic reaction is suspected, such as swelling, redness or puffiness, return to me. The lashes may need to be removed and the area bathed with cool damp cotton wool. If the reaction is severe medical advice should be sought.

Do **not** get the lashes wet for the next 24 hours, i.e no swimming, sauna, showers. This allows the bond to set really well.

Refrain from rubbing the eyes and gently comb through each morning to untangle and tidy the lashes.

Applying serum or the Finishing Glaze £20.00 will prolong the life of the lashes while keeping them looking tidy, curlier, healthier and thicker. We retail this within the salon.

Do **not** perm the lashes or use eyelash curlers and if you wish to use mascara it must be water soluble **NOT WATERPROOF**. We retail a Black Eyelash Extension Mascara for £15.00 and it is fantastic!! Ensure you use **OIL FREE** makeup remover.

Come back for regular infills between 2 and 3 weeks any longer between appointments may mean you will need a Full Set and longer appointment.
