Lash Lift/Lash and Brow Tint

Aftercare Advice

Avoid rubbing the eyes. We will try to ensure every trace of dye is removed but it is possible that residues may remain.

Avoid putting your contact lenses back in for the rest of the day.

Avoid heat treatments and sunbathing for 24 hours, as this fades the tint.

Do **not** apply make-up or receive any other eye treatments for at least 24 hours after your treatment.

Lash Lifts/Eyelash Perms should **not** be repeated on the lashes within 8 weeks of the previous treatment.

Eyelash Tints are recommended every 4-6 weeks and Eyebrow Tints every 3 – 4 weeks.
